Information

BD Hypak™ for Biotech

Glass Prefillable Syringe

A route widely traveled

BD Hypak™ for Biotech is BD's versatile glass prefillable system – specifically optimized for biotech drugs, addressing key factors of compatibility with drug and secondary active packaging.

Increased patient convenience assurance through optimized container/device integration

New specifications

- Gliding force
- Flange resistance
- Tighter specifications on other attributes

New drawings

- Additional dimensions
- Tighter tolerance

Benefits

- Increased autoinjector compatibility
- Minimized risk of incomplete injection

Reduced number of cosmetic defects

Tighter specifications on cosmetic defects

- Technology investments reducing glass-to-glass contact
- Premium glass cane
- Additional visual inspection and new specifications on visual defects

Benefits

- Fewer visual defects on syringe barrels
- Reduction of false rejects of filled syringes
- Improved total cost of ownership

Reduce risk of container/sensitive drug interactions

New specification on tungsten residues

- Low tungsten as standard
- Optimized process settings
- Guaranteed through ICP-MS results on certificate

Benefits

- Enables risk mitigation for your sensitive drug
- Enables a robust regulatory filing
