BD Hylok™
Glass Pre-fillable Syringe for Hyaluronic Acid

Secure in your hands, safe for your patients*

BD Hylok™ is a robust drug delivery system that supports your commercial success:

• Excellent performance demonstrated after steam sterilization** ¹
• Offering optimized user experience thanks to a safe and robust connection¹ ³

* No needle or LLA disconnection, no LLA rotation¹ ²
** Terminal steam sterilization cycles at 121°C / 2 cycles / 20 minutes

¹ ² ³
BD Hylok™ is an innovative Glass Pre-fillable Syringe designed for the administration of Hyaluronic Acid

- Injection of hyaluronic acid exerts a high pressure on the syringe, due to the viscosity of the product⁴

45% of dermatologists identified leakage as the main problem with hyaluronic acid syringes⁵ in a recent international survey

72% of decision makers in the Hyaluronic Acid industry expressed a preference for glass over plastic syringes in an international study⁶; they favored material inertness and resistance to steam sterilization

BD Hylok™ provides superior performance for end-users thanks to:

- Its patented strongly affixed LLA for safe and robust needle connection¹ ³ ⁷
- Its intuitive screw-on tip cap, preferred by users over a standard clip-on tip cap⁸
